

Input the Title of your Web Quest Here

Introduction:

Write a short paragraph here to introduce the activity or lesson to the students. Develop a role or scenario (example: "You are a detective trying to identify the mysteries of the human digestive system") to set the stage for the activity. The purpose is to prepare and hook the student.

The Task:

Describe crisply and clearly what the end result of the learner's activities will be. Your task should consist of a minimum of 10 questions and 5 web sites. Five of the questions can be knowledge and comprehension level but at least five must be at the application, analysis, synthesis or evaluation level. Students can also be asked to complete tasks at various web sites.

This section should contain:

- List of student questions to be answered and links to the sites containing the information
- Any products that the student is to create and how they are to document them (make copy etc)

Student Question	Web-Site

The Process:

Describe what steps students must follow to complete the tasks. This section should be described well enough that other teachers can see how to perform the lesson and could implement it easily. An example would be:

- Write the question to be answered on your answer sheet
- Click on the link beside the question above
- Search the site to find the key information
- List the responses on your answer sheet or make a copy of your result.
